Technical details

NEW DESIGN OF COVERCO 4" REWINDABLE OIL-FILLED MOTOR

The design has been further developed to make it even more reliable and resilient. The motor is more compact with excellent performance.

- Reliable and resilient construction
- New modernized winding design
- Robust mechanical design
- Excellent performance
- Reduction of plastic parts
- Suitable for VFD operation
- Flexibility of power supply, even at low voltages

Cable material compliant with drinking water standards

Sand protection / Mechanical seal

allow optimal operation even in the presence of sand in the well

Rewindable oil-filled submersible motors

Motors are pre-filled with a dielectric fluid (known as „white oil“), approved by the FDA and other international pharmacological institutes

Single-phase / Three phase

The motors can be powered with single-phase and three-phase power supply.

Axial and radial oil lubricated bearings

allow maintenance-free operation.*
